

I'm very concerned that the government feels the need to spend valuable time and tax money on stifling my right to benefit from the informative and quality entertainment broadcast via XM satellite radio. I pay for this service and it shouldn't be up to the NAB to decide what I can listen to. I can not get this quality radio anywhere else. This why I've chosen to subscribe to it. I respectfully urge you to reject the NAB's petition 04-160. I strongly oppose HR 4026 and feel it is every American's right to choose what to listen to on the radio...especially if it I'm paying for it!
